Curriculum Map - Key Stage 4

Art

Year 10 Exam Board: Edexcel		
Curriculum Aims	• Enhance a student's direct observational recording skill. • Develop a student's practical skills in a variety of different media, including oil paint and clay. • Make contextual links with the work of other artists.	
Main topics/areas studied this year	**Term 1**	Direct observational graphic studies using a range of different drawing media. Connections made to relevant contextual sources.
	Term 2	Direct observational studies using oil paint to explore reflective properties between objects. Connections made to relevant contextual sources.
	Term 3	Direct observational clay study of the human figure, with relevant developmental drawings.
	Summary	Students will: • Increase their competence in recording information from direct observation. • Find out their specific strengths and aptitudes in specialist art media. • Increase their proficiency at making connections between their own and other artist's work.
Assessment Headlines	• On-going formative assessment as work progresses in lessons. • End of term written summative assessment and working at grade for the conclusion of termly projects.	
Useful Resources	**Books**	**Websites**
Number of lessons in this subject:	5 lessons per fortnight	
Mid-year exam will assess:		
End of year exam will assess:

Computer Science

<table>
<tr><th colspan="3">Year 10
Exam Board: OCR</th></tr>
<tr><td>Curriculum Aims</td><td colspan="2">• Comprehend and utilize core principles of Computer Science, such as abstraction, decomposition, logic, algorithms, and data representation.
• Develop problem-solving skills by analyzing computational challenges and gaining hands-on experience in designing, coding, and debugging programs.
• Cultivate creative, innovative, analytical, logical, and critical thinking abilities.
• Gain an understanding of the components of digital systems and how they interact with each other and with other systems.
Recognize the societal and individual impacts of digital technology and apply relevant mathematical concepts to Computer Science.</td></tr>
<tr><td rowspan="3">Main topics/areas studied this year</td><td>Term 1</td><td>• Architecture of CPU
• CPU Performance
• Embedded Systems
• Primary Storage
• Secondary Memory
• Unit and Data Storage
• Programming Python</td></tr>
<tr><td>Term 2</td><td>• Networks and Topologies
• Networks, Protocols and Layers
• Network Threats
• Prevention Methods
• Programming Python</td></tr>
<tr><td>Term 3</td><td>• Operating Systems
• Utility Software
• Ethical and Legal impacts on Technology
• Programming Python</td></tr>
<tr><td>Assessment Headlines</td><td colspan="2">This component is an externally assessed written examination testing AO1 and AO2.

This is a compulsory component.

It is worth 80 marks, representing 50% of the total marks for the GCSE (9–1).

The examination lasts 1 hour 30 minutes.

All the questions are mandatory.

Students are not permitted to use a calculator in the examination.

The question paper will consist of short and medium answer questions. There will also be one 8-mark extended response question. This question will enable students to demonstrate the ability to construct and develop a sustained line of reasoning.</td></tr>

Curriculum Map - Key Stage 4

Design and Technology

Year 10 Exam Board: AQA 8552C GCSE		
Curriculum Aims	To create an independent creative and problem-solving mindset. Students will have a range of skills learnt through Key Stage 3 and will be at a stage to embrace the GCSE theory and final coursework independent project at the end of year 10.	
Main topics/areas studied this year	**Term 1**	**Theory Focus** • **Robotics & Automation**: CAD/CAM, FMS, JIT, Lean Manufacturing. (Case studies: Jaguar Land Rover, Toyota) • **Enterprise, Market Pull & Tech Push**: Crowdfunding, co-operatives, ethical business models. • **People, Society & Culture**: Inclusive design, demographic suitability, redesigning products for different user groups. • **Sustainability & the Environment**: Finite vs. non-finite resources, LCA (Life Cycle Assessment), planned obsolescence, maintenance/repair. **All mini practical projects will run in the same format as the NEA final project. Students will be more creative and will show and demonstrate deeper thinking in designing and problem solving. This practice prepares them for the standard and rigor they will be expected to demonstrate towards the end of year 10 when they start their final NEA assignment.** **Project A: Night Light Revisited** • **Overview**: Students build on their Year 8 electronics experience, creating a more advanced night light incorporating improved circuit design, possibly a switch/dimmer or themed enclosure. • **Skills:** Revisiting safe soldering, circuit diagrams, enclosure prototyping (ply/acrylic), optional CAD elements for more precise laser-cut parts. • **Outcomes**: Functional bedside lamp with a refined finish, demonstrating deeper electronics knowledge. **Project B: Useful Boxes/ Organisational Box** • **Overview**: Students design organisational boxes using 2D/3D software (e.g. finger/lap joints). • **Skills**: Laser cutting or precise hand-cutting, adjusting for kerf/tolerance. • **Outcomes**: Accurate box assembly, neat finishing, reflection on material selection.
	Term 2	**Theory Focus** • **Responsible Design:** Fair labour, responsible sourcing, ethical impact of manufacturing choices. • **Renewable & Non-Renewable Resources:** Wind, solar, fossil fuels, nuclear; "Moja Island" scenario for energy mix proposals. • **Systems & Motion:** Revisiting input-process-output; mechanical devices (levers, linkages, gears), types of motion (linear, rotary, reciprocating,

<table>
<tr><td rowspan="2"></td><td></td><td>oscillating).
• Modern & Smart Materials: Thermochromics, shape memory alloys, technical textiles (e.g. Kevlar, Gore-Tex).

Project C: Educational Toy
• Overview: Students design and prototype a toy that reinforces specific learning objectives (e.g. numeracy, spelling, basic coding). Aimed at a defined age group.
• Skills: User research (child needs, safety regulations), iterative prototypes (card or MDF), possible integration of simple mechanisms or electronics.
• Outcomes: A functional, child-safe toy addressing a curriculum-based or skill-building target (e.g. matching shapes/letters, mechanical puzzles). Students produce a reflective analysis of how the toy meets educational needs.</td></tr>
<tr><td>Term 3</td><td>Theory Focus
• Material Properties (Consolidation): Compare paper/board, hardwoods, softwoods, manufactured boards, metals, polymers.
• Review any topics that need more insight into
• Exam-Style Questions: Scenario tasks (e.g. user needs, sustainability vs. cost constraints, brand identity).
• NEA Preparation: Introduce iterative design cycles, user questionnaires, research techniques for the upcoming Year 11 NEA.

During June, the exam board will release the NEA task and students will then research this section during the summer break and into year 11</td></tr>
<tr><td>Assessment Headlines</td><td colspan="2">Mid-Year Exam (Spring): Covers theory from Autumn and early Spring (automation, enterprise, sustainability, user-centred design, basic material properties).

End of Year Exam (Summer): Summative coverage of all Year 10 topics including material properties, responsible sourcing, mechanical systems, user centred design, and CAD/CAM. Scenario-based exam questions to reinforce exam readiness.</td></tr>
<tr><td rowspan="2">Useful Resources</td><td>Books</td><td>Websites</td></tr>
<tr><td>AQA GCSE Design & Technology

Make UK (formerly EEF)
Insights into the UK manufacturing sector - useful for real-world case studies on robotics, lean manufacturing, enterprise, and sustainability.

How Stuff Works
Good for background reading on processes, mechanisms, engineering, and technology topics that might appear in design contexts.</td><td>TechnologyStudent.com
A go-to for GCSE D&T students. Covers materials, processes, mechanisms, electronics, packaging, and more, with clear diagrams and quizzes.

BBC Bitesize GCSE D&T
Offers topic summaries, interactive activities, and mini tests aligned with the UK GCSE curriculum.

The Design Museum
Features online collections, designer profiles, and case studies on modern design. Great for research and inspiration.</td></tr>
</table>

	Wood Campus Tutorials, guides, and best practices for working with timber, focusing on joinery, finishing, and construction.	**The Dyson Foundation** Has resources on design engineering, problem-solving tasks, and insight into Dyson's iterative design processes. **Study Rocket** Broad bank of D&T resources (units, worksheets, projects) **Tinkercad (tinkercad.com)** User-friendly online 3D CAD for quick prototypes. Ideal for GCSE-level introduction to digital modelling. **Mr. DT (YouTube)** Video tutorials on technical drawing, isometric/orthographic projection, and CAD tips.
Number of lessons in this subject:	5 lessons per fortnight (single lessons)	
Mid-year exam will assess:	Covers theory from Autumn and early Spring (automation, enterprise, sustainability, user-centred design, basic material properties).	
End of year exam will assess:	Summative coverage of all Year 10 topics: advanced materials, responsible sourcing, mechanical systems, educational toy design, and CAD/CAM. Scenario-based exam questions to reinforce exam readiness.	

Curriculum Map - Key Stage 4
English

<table>
<tr><th colspan="3">Year 10
Exam Board: AQA</th></tr>
<tr><td>Curriculum Aims</td><td colspan="2">In English, students follow a two-year GCSE course, which involves reading, writing and spoken language. Students prepare to sit both two English Language and two English Literature examinations. At the end of the course each student will obtain two qualifications.

Our aim is to develop compassionate, reflective, and ambitious learners - global citizens who are equipped with the literacy skills and cultural knowledge to succeed. Through the power of English, we help students find their voice and envision a future without limits.</td></tr>
<tr><td rowspan="2">Main topics/areas studied this year</td><td>Term 1</td><td>AQA Spoken Language Endorsement
Students officially begin their English Language GCSE course: researching, writing and performing a speech on a topic of their choice. This will be assessed for their GCSE Spoken Language Endorsement.

AQA Worlds and Lives Poetry Anthology - Cluster 1
Students study a selection of poems from AQA's Worlds and Lives anthology. They learn to explore ideas and issues raised in the poems, and discuss and write about the poems' content, language, structure and message. They learn to engage with and write about both individual poems and paired poems which they compare.

19th Century Novel Study: A Christmas Carol by Charles Dickens
Students study Charles Dickens' 'A Christmas Carol'. They will learn to explore the writer's message, the context in which a novel is written and received and explore how meaning is made through a writer's methods. Alongside this focus on literature, we will also spend some time developing creative writing skills practising writing fiction, in preparation for the language exam.</td></tr>
<tr><td>Term 2</td><td>AQA Worlds and Lives Poetry Anthology - Cluster 1
Students study a selection of poems from AQA's Worlds and Lives anthology. They learn to explore ideas and issues raised in the poems, and discuss and write about the poems' content, language, structure and message. They learn to engage with and write about both individual poems and paired poems which they compare.

Modern Drama: An Inspector Calls by J.B. Priestley
An Inspector Calls by J.B. Priestley is a mystery drama that explores themes of social responsibility, class, and morality as the Birling family are questioned about their role in a young woman's death, with Priestley using the play to challenge the audience's views on inequality and highlight the importance of collective responsibility in society. Students will then learn to write critical essays, exploring language, form and structure, and considering the context in which the play was written.</td></tr>
</table>

	Term 3	**AQA *Worlds and Lives Poetry Anthology* – Cluster 3** Students study a selection of poems from AQA's Worlds and Lives anthology. They learn to explore ideas and issues raised in the poems, and discuss and write about the poems' content, language, structure and message. They learn to engage with and write about both individual poems and paired poems which they compare. **AQA English Language Paper 1 & 2** **Explorations in Creative Reading and Writing – Paper 1** Students read and explore a range of fiction writing published across the 19th, 20th and 21st centuries, developing their interpretation skills and confidence in responding to unseen texts in the English Language Paper 1 exam. They then use these to inspire their own creative writing, considering how writers use a range of methods for effect and meaning, and applying this to their own work. They use reciprocal reading skills and effortful reading to unpick and explore a variety of texts **Writer's Viewpoints and Perspectives - Paper 2** Students use reciprocal reading skills to effortfully study and explore a range of non-fiction text extracts, ranging from the 19th century to the modern day. They develop the skills of retrieval, summary, inference, language analysis, structural analysis, evaluation and comparison. They then take these ideas and skills and apply them to their own writing, preparing to explore their reading of non-fiction pieces and to write their own. **Revision for Mock Exams** Before the mock exams there is a focus on consolidating knowledge and skills in preparation for both English Literature and English Language. Students will revisit key texts, practice exam-style responses, and refine strategies for analysis, comparison, and effective written expression.
	Summary	In Year 10, students deepen their study of both English Literature and English Language, engaging with core GCSE texts including *A Christmas Carol*, *An Inspector Calls*, and selections from the AQA *Worlds and Lives* poetry anthology. Alongside literature study, they develop key language skills through creative and transactional writing, analysis of fiction and non-fiction texts, and the AQA Spoken Language Endorsement. The year concludes with revision and exam preparation, consolidating knowledge and refining exam techniques across both papers to support success in mock assessments.
Assessment Headlines	**AQA GCSE English Language** **Reading Skills** • Identify and interpret explicit and implicit information and ideas • Select and synthesise evidence from different texts • Explain, comment on analyse how writers use language and structure to achieve effects and influence readers, using relevant subject terminology to support their views • Compare writers' ideas and perspectives, as well as how these are conveyed, across two or more texts • Evaluate texts critically and support this with appropriate textual references	

<table>
<tr><td></td><td colspan="2">Writing Skills
• Communicate clearly, effectively, and imaginatively, selecting and adapting tone, style and register for different forms, purposes and audiences
• Organise information and ideas, using structural and grammatical features to support coherence and cohesion of texts
• Use a range of vocabulary and sentence structures for clarity, purpose and effect, with accurate spelling and punctuation.

AQA GCSE English Literature
Reading Skills
• Literal and inferential comprehension
• Maintain a critical style and develop an informed personal response
• Use textual references, including quotations, to support and illustrate interpretations.
• Critical reading
• Evaluation of a writer's choice of vocabulary, grammatical and structural features

Writing skills
• Producing clear and coherent text
• Accurate Standard English: accurate spelling, punctuation and grammar</td></tr>

Geography

<table>
<tr><th colspan="3">Year 10
Exam Board: Edexcel B</th></tr>
<tr><td>Curriculum Aims</td><td colspan="2">The aims of this course are to enable students to build on their Key Stage 3 knowledge and skills to:
• Develop and extend their knowledge of locations, places, environments and processes, and of different scales, including global; and of social, political and cultural contexts.

• Gain understanding of the interactions between people and environments, change in places and processes over space and time, and the interrelationship between geographical phenomena at different scales and in different contexts.

• Develop and extend their competence in a range of skills, including those used in fieldwork, in using maps and Geographical Information Systems (GIS) and in researching secondary evidence, and develop their competence in applying sound enquiry and investigative approaches to questions and hypotheses.</td></tr>
<tr><td rowspan="3">Main topics/areas studied this year</td><td>Term 1</td><td>Topic 2: Development dynamics
• What is the scale of global inequality and how can it be reduced?
• How is ONE of the world’s emerging countries managing to develop? (India case study)</td></tr>
<tr><td>Term 2</td><td>Topic 4: The UK's evolving physical landscape
• Why does the physical landscape of the UK vary from place to place?
• Why is there a variety of distinctive coastal landscapes in the UK and what are the processes that shape them?
• What are the challenges for coastal landscapes and communities and why is there conflict about how to manage them?
• Why is there a variety of river landscapes in the UK and what are the processes that shape them?
• What are the challenges for river landscapes, people and property and how can they be managed?

Topic 6: Geographical investigations - two investigations, including fieldwork and research, carried out in contrasting environments, one from 'River processes and pressures' and the other from 'Dynamic urban areas'.
• Investigating how and why drainage basin and channel characteristics influence flood risk for people and property along a river in the UK. Investigate how and why quality of life varies within urban areas</td></tr>
<tr><td>Term 3</td><td>Topic 3: Challenges of an urbanising world
• What are the causes and challenges of rapid urban change?
• Why does quality of life vary so much within ONE megacity in a developing country OR emerging country? (Mumbai Case study)

Topic 1: Hazardous Earth
• How does the world’s climate system function, why does it change and</td></tr>
</table>

		how can this be hazardous for people? • How are extreme weather events increasingly hazardous for people? (Hurricane Katrina and Typhoon Haiyan case study) • Why do the causes and impacts of tectonic activity and management of tectonic hazards vary with location? (Japan and Haiti case study)
Assessment Headlines	**Paper 1:** • The assessment is 1 hour and 30 minutes. • The assessment consists of three sections (Topic 1, Topic 2 and Topic 3) • The assessment is out of 94 marks. • The paper will assess spelling, punctuation, grammar and use of specialist terminology which will contribute 4 marks towards the overall marks for this paper. • Each question is set in a context. • The exam includes multiple-choice questions, short open, open response, calculations and 8-mark extended writing questions. **Extended writing questions will assess students' ability to develop extended written arguments and to draw well-evidenced and informed conclusions about geographical questions and issues.** **Paper 2:** • The assessment is 1 hour and 30 minutes. • The assessment consists of three sections (Topic 4, Topic 5 and Topic 6) • The assessment is out of 94 marks. • The paper will assess spelling, punctuation, grammar and use of specialist terminology which will contribute 4 marks towards the overall marks for this paper. • Each question is set in a context. • The exam includes multiple-choice questions, short open, open response, calculations and 8-mark extended writing questions. **Extended writing questions will assess students' ability to develop extended written arguments and to draw well-evidenced and informed conclusions about geographical questions and issues.** **Paper 3:** • The assessment is 1 hour and 30 minutes. • The assessment is out of 64 marks. • The paper will assess spelling, punctuation, grammar and use of specialist terminology which will contribute 4 marks towards the overall marks for this paper. • Each section explores an aspect of a geographical issue leading to the final decision-making question related to the issue. • The exam includes multiple-choice questions and will include short open, open response and extended writing questions. Section C will include 6-mark extended writing questions and Section D will offer a choice of one from three decisions assessed by a 12-mark extended writing question. **Extended writing questions will assess students' ability to develop extended written arguments and to draw well-evidenced and informed conclusions about geographical questions and issues.**

Unit 1 - Congruence, similarity and enlargement
• Enlargement by positive and fractional scale factors, find missing lengths and angles using similarity and identify congruent triangles (F)
• Negative scale factor, area and volume of similar shapes, congruence (H)

Unit 2 - Trigonometry
• Find missing sides and angles using right angled trigonometry (F)
• Trigonometry in 3D, sine and cosine rule, area of any triangles (H)

Unit 3 - Representing solutions of equations & inequalities
• Forming and solving equations and inequalities, show and interpret inequalities on a number line, draw and find solutions to equations using straight line graphs (F)
• Represent inequality solutions on number lines and using set notation, solving quadratic equations and inequalities by factorisation (H)

Unit 4 - Simultaneous equations
• Solving linear simultaneous equations algebraically and graphically (F)
• Solving simultaneous equations with both linear and one linear and one quadratic, solving involving a third unknown (H)
</td></tr>
<tr><td>Term 2</td><td>
Unit 5 - Angles and bearings
• Measure, read and draw angles and bearing, interpret scale diagrams, solve bearing problems using trigonometry and Pythagoras (F)
• Solve bearing problems using sine and cosine rule (H)

Unit 6 - Circles
• Calculate circumference, area, arc length and sector area of circles, calculate surface area and volume of cylinders, spheres and cones (F)
• Use and prove circle theorems, surface area and volume of cylinders, spheres and cones, problems with area and volume of similar shapes (H)

Unit 7 - Vectors
• Represent, draw and use vectors, vector addition and subtraction (F)
• Represent, draw and use vectors, including vector addition and subtraction, geometrical problems with vectors (H)
</td></tr>
</table>

		Unit 8 - Ratio and fractions • Comparing, sharing and interpreting ratio, unit ratios, currency conversion, best buy problems, combining ratios, linking ratio and algebra **(F)** • Use ratio and fractions to make comparisons, currency conversions, unit ratios, best buy problems, ratio in area and volume problems **(H)** **Unit 9 - Percentages and interest** • Compare and covert fractions, decimals, percentages, percentages of amounts, increases and decreases, simple and compound interest, original amount percentage change, growth and decay **(F)** • Repeated percentage change, iteration, growth and decay **(H)**
	Term 3	**Unit 10 - Probability** • Single event probabilities using tables, Venn diagrams, frequency trees and tree diagrams for independent/dependent events, relative frequencies **(F)** • Probabilities from tables, Venn diagrams and frequency trees, construct and interpret tree diagrams for conditional probability **(H)** **Unit 11 - Collecting, representing and interpreting data** • Populations, samples, frequency tables and polygons, two-way tables, pie charts, histograms, averages, time series, stem and leaf, scatter graphs **(F)** • Stratified sampling, frequency tables and polygons, histograms, stem and leaf, cumulative frequency diagrams, box plots, scatter graphs with extrapolation **(H)** **Unit 12 - Non calculator methods** • Rounding, limits of accuracy, financial maths problems **(F)** • Surds, upper and lower bounds, financial maths problems **(H)** **Unit 13 - Types of numbers and sequences** • Prime factorisation, HCF and LCM, arithmetic, geometric sequences, nth term **(F)** • Sequences with surds, quadratic sequences **(H)** **Unit 14 - Indices and roots** • Powers, roots, standard form and index laws **(F)** • Fractional indices, calculations with standard form **(H)**
Assessment Headlines	Short end of unit checks assessing key concepts. Mid-year and end of year assessments will be a mix of fluency, application and problem solving. Questions will be a mix of fluency, application and problem solving. The questions vary in level of difficulty, getting progressively more challenging throughout the paper. There will be a mix of calculator and non-calculator papers.

Mid-year exam will assess:	**Performance Assessment - Learners will be assessed on:** • Their application of performance skills, including interaction with other performers, where appropriate, throughout the performance, to realise artistic intentions. • Their ability to create and interpret a character/role using relevant aspects of the practitioner/genre style to realise artistic intention. • Their individual contribution to the performance and their ability to sustain audience interest throughout the performance.
End of year exam will assess:	**Noughts and Crosses Exam - Learners must consider how the text is constructed and how performances create meaning through:** • The characteristics of the performance text, including genre, structure, character (including interpretation and function within an extract), form and style, language/dialogue, stage directions. • The social, historical, and cultural context including the theatrical conventions of the period in which the performance text was created. • How meaning is interpreted and communicated through performance conventions, use of performance space and spatial relationships on stage, including the impact of different stages (proscenium arch, theatre in round, traverse and thrust) on at least one scene o relationships between performer and audience, the design of lighting, sound, set (including props) and costume, hair and make-up, the actor's vocal and physical interpretation of character.

Curriculum Map - Key Stage 4

Performing Arts - Music

Year 10 Exam Board: Eduqas		
Curriculum Aims	Students will spend year 10 learning how to expand their knowledge of the musical elements and start explaining in great detail the impact they can have on pieces of music. In year 10 students will be introduced to the four Areas of Studies. They will explore, study, and understand two setworks whilst working on developing their compositional and performance skills.	
Main topics/areas studied this year	**Term 1**	• **Interpreting music** - Students will be listening to unfamiliar pieces of music whilst using the musical elements to describe these pieces of music. Students will have to use high levels of musical vocabulary and specialist terminology to describe what they hear. • **Forms and Devices** - Students will be looking at the Baroque period, Classical period, and the Romantic period in music. Students will be learning all the terminology that is associated with Forms and devices as well as composition and playing techniques. • **Setworks** - Students will start to learn about one of two pieces of music that are set directly by EDUQAS that they will be asked questions about in their written paper.
	Term 2	• **Music for Ensemble** - Students will be looking at different ensemble groupings used in music such as Chamber music, Musical theatre and Blues and Jazz. They will learn specialized vocabulary to describe each one and understand how to perform and compose in this style. • **Film Music** - Students will be looking at the history of film music. They will learn specialized vocabulary to describe each one and understand how to perform and compose in this style. • **Setworks** - Students will start to learn about one of two pieces of music that are set directly by EDUQAS that they will be asked questions about in their written paper. • **Free Composition**
	Term 3	• **Composition** - Students will continue to develop their compositional skills. Students will be working on draft one of their set work composition and will continue to improve it. • **Popular Music** - Students will be looking at Popular Music. They will learn specialized vocabulary to describe each one and understand how to perform and compose in this style. • **Setworks** - Students will start to learn about one of two pieces of music that are set directly by EDUQAS that they will be asked questions about in their written paper.

- **Topic 6** - Radioactivity

Paper 6: Physics 2 (Paper code: 1SC0/2PF, 1SC0/2PH)
Written examination: 1 hour 10 minutes. 16.67% of the qualification. 60 marks.

Content overview

Topic 1 - Key concepts of physics
Topic 8 - Energy - Forces doing work
Topic 9 - Forces and their effects
Topic 10 - Electricity and circuits
Topic 12 - Magnetism and the motor effect
Topic 13 - Electromagnetic induction
Topic 14 - Particle model
Topic 15 - Forces and matter

Assessment overview

A mixture of different question styles, including multiple-choice questions, short answer questions, calculations and extended open-response questions. Calculators may be used in the examination.

Number of lessons in this subject:	9 lessons per fortnight	
Mid-year exam will assess:	• **Biology** - Cells and Control • **Chemistry** - Acid and Bases • **Physics** - Waves and EM Spectrum • **Biology** - Genetics	
End of year exam will assess:	**Biology** • Key Concepts in Biology • Plant Structures and their Functions • Ecosystems and Material Cycles • Cells and Control • Genetics • Natural selection and Genetic Modification **Chemistry** • States and Separating Techniques • Atoms and Periodic Table • Structure and bonding • Calculations in chemistry • Acid and Bases • Groups, Rates & Energy changes **Physics** • Motion • Forces • Energy • Waves and EM Spectrum • Radioactivity	

Curriculum Map - Key Stage 4

Spanish

<table>
<tr><th colspan="3">Year 10
Exam Board: Edexcel</th></tr>
<tr><td>Curriculum Aims</td><td colspan="2">• To provide students with the necessary range of grammar and vocabulary to understand and express themselves in Spanish.
• To develop an understanding of other cultures based on respect and knowledge.</td></tr>
<tr><td rowspan="4">Main topics/areas studied this year</td><td>Term 1</td><td>Digital Life
Free Time Activities
Holidays and Travel</td></tr>
<tr><td>Term 2</td><td>Family
Physical and Personality Descriptions
Healthy Lifestyle
Accidents and Injuries</td></tr>
<tr><td>Term 3</td><td>School Life
Local Area and Cities
Shopping</td></tr>
<tr><td>Grammar</td><td>Nouns and adjectives agreement
Conjugated verbs in several tenses
Articles and pronouns
Adverbs, sequencers</td></tr>
<tr><td>Assessment Headlines</td><td colspan="2">Paper 1 - Speaking in Spanish:
• Foundation tier: 7-9 minutes plus 15 minutes preparation time; 50 marks
• Higher tier: 10-12 minutes plus 15 minutes preparation time; 50 marks
• 25% of the qualification

Paper 2 - Listening and Understanding:
• Foundation tier: 45 minutes, including 5 minutes reading time, 50 marks
• Higher tier: 60 minutes, including 5 minutes reading time, 50 marks
• 25% of the qualification

• Paper 3 - Reading and Understanding:
• Foundation tier: 45 minutes, 50 marks
• Higher tier: 60 minutes, 50 marks
• 25% of the qualification

Paper 4: Writing in Spanish:
• Foundation tier: 1 hour 15 minutes; 50 marks.
• Higher tier: 1 hour 20 minutes; 50 marks.
• 25% of the qualification</td></tr>
